Parkonect: Valet Hiker Ticket Recommendations

Valet Hiker Guides · https://qa.flashparking.com/docs/parkonect-valet-hiker-ticket-recommendations/

1. You should use QR codes that are **~ .75” x .75” in size** .
2. Ticket numbers should be **sequential** and the # of digits should never change.
    a. For instance, if you’re ordering 100 tickets don’t order 001-100, order 000001-000100 instead.
3. A **letter** should be placed in front of the ticket range.
    a. For instance, E000001-E000100
    b. **Some letters can’t be used with the Parkonect system (H,M,P,V,W,Z – they’re used for other barcodes like validations and monthly)**
4. **Don’t** use dark-colored ticket stock.
    a. Scanners have a hard time picking up the black QR code against a dark blue ticket stock (as an example)
5. Include the **QR code** on **all parts** of the ticket (so if a valet loses a part, the windshield tag or claim check can always be used for ingress /
