ParkWhiz Multipasses

ParkWhiz Console Configurations · https://qa.flashparking.com/docs/parkwhiz-multipasses/

Multipass parkers are allowed multiple entries and exits at a Flash PARCS location using the same Arrive barcode. Multipass search can be filtered by several categories, allowing for fast access and editing.

MultiPass Filtering

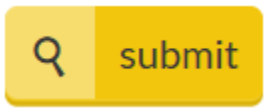

Note

Filtering categories by Active, Upcoming and Inactive have the same filtering fields.

- **From**: Show Multipasses that start after this date.
- **To**: Show Multipasses that end before this date.
- **Name**: Show Multipasses whose name contains the text presented in this field.
- **Select Locations**: Show Multipasses that are available to the selected locations.

- **Unlimited**: Flag that shows any multipasses that have no restrictions on any number of uses or number of concurrent uses.
- **Sort By**: This dropdown filters passes by options of Name (A-Z or Z-A), Created Date (newest or oldest), Total Uses (most or least), Active Tickets (most or least), and Usage Window (earliest or latest).

After selecting the desired search parameters, click the Submit button to populate results.

Results

Results will populate in the lower part of the screen, showing columns for Name, Created At, Active Tickets, Total Uses, and Multipass Use Period.
